# Computing resources and shared services

- **Available Kubernetes clusters:**
  - SLA to be understood
  - Accounting to be set-up
- More resources will be made available at CNAF (1500 cores)
  - Set-up all test components at CNAF
- PIC and Lyon already receiving LL data
- Set-up automated GWCelery acceptance tests at UniGe
- **Needed services:** InfluxDB, Secrets (possibly also needed in production) → production grade
