

FRONTIERS WINTER SCHOOL

29th – 31st January and 5th – 7th February

Do you believe that exciting discoveries such as the Discovery of Gravitational Waves or the Discovery of the Higgs Boson can be brought in the classroom in a consistent and understandable fashion? Can you imagine your students performing virtual visits to CERN or VIRGO, analysing real experimental data and interacting with world leading scientists in the field of Physics?

If the answer to these questions is YES, we have great news for you: FRONTIERS, the European initiative for bringing Nobel Prize Physics to the classroom announces its first international e-winter school for teachers!

How can I learn more about the winter school?:
