

Today's visit

High-school students from Thessaloniki
EGO visit, April 5th 2017

Nicolas Arnaud (narnaud@lal.in2p3.fr)

Laboratoire de l'Accélérateur Linéaire (CNRS/IN2P3 & Université Paris-Sud)
European Gravitational Observatory (Consortium, CNRS & INFN)

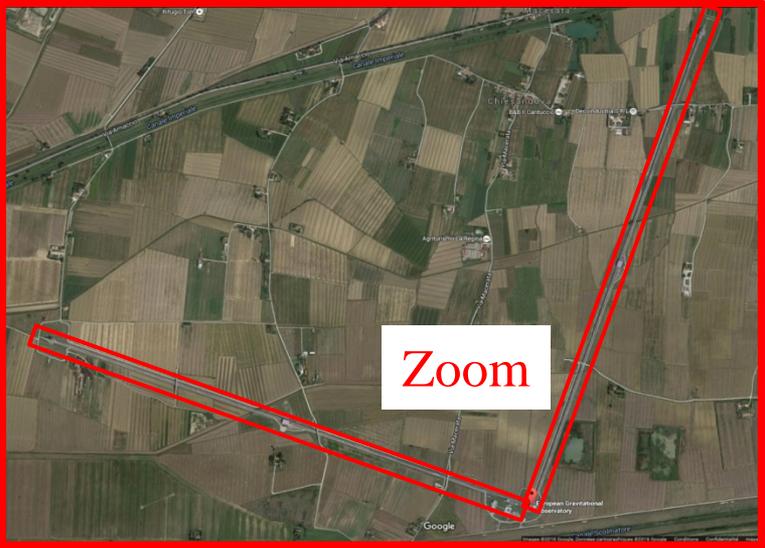

Welcome!

- Welcome to the **European Gravitational Observatory (EGO)**
 - **Site of the Virgo experiment**
 - Virgo is a **giant** (3-km arms) **suspended** and **recycled Michelson interferometer** designed to make **direct detections of gravitational wave (GW)** signals
 - **Advanced Virgo (AdV)** is the second generation Virgo detector
 - **Commissioning in progress after a 5-year upgrade**
 - **Goal: improve the overall sensitivity by one order of magnitude**
- Next step: **join the two Advanced LIGO (aLIGO) detectors in Spring 2017**, for a **first common data taking period**

The Virgo site

Leaning Tower of Pisa

Pisa airport
Runway length: 3 km

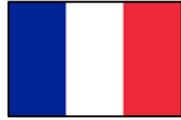

Virgo

European Gravitational Observatory

The Virgo Collaboration

- 6 European countries

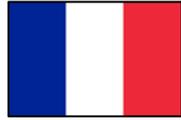

- 21 laboratories

- About 300 members (LIGO : 750)

The Virgo Collaboration

- 6 European countries

- 21 laboratories

- About 300 members (LIGO: 750)

- Virgo was built by 11 **CNRS** (France) and **INFN** (Italy) laboratories
 - Budget: ~150 M€
 - Groups from the Netherlands, Poland, Hungary and Spain joined later the project

- Advanced Virgo funding: ~20 M€
 - Plus in-kind contribution from NIKHEF

- The **EGO** (European Gravitational Observatory) consortium is managing the Virgo site in Cascina. It provides the infrastructures and resources to ensure the detector construction and operation

A bit of history

- 1980's: Collaboration between **Alain Brillet** (CNRS, Orsay, lasers) and **Adalberto Giazotto** (INFN, Pisa, suspensions)
- 1989: **Proposal**
- June 27 1994: **Project approved** by CNRS and INFN
- May 1997: Final **design report**
- 2003: **End of construction phase**
- 2007-2010: **Data taking periods**
 - Virgo first, then Virgo+
- 2011-2016: **Upgrade to Advanced Virgo**
 - 2015: **first direct detections of gravitational waves**
 - Data recorded by the two Advanced LIGO detectors
 - Jointly analyzed by LIGO and Virgo
- 2017: **First joint Advanced LIGO – Advanced Virgo data taking period [!!!???)**

Virgo from the sky
