

The null stream of the Einstein Telescope in its triangular configuration

Wednesday 28 May 2025 15:42 (12 minutes)

Several uses of the null stream have been proposed, which indicate a fundamental advantage provided by the null stream for the detection and analysis of GW signals. In my talk, I will review and scrutinize the arguments, and I will conclude that we do not have a convincing argument yet that the ET null stream indeed offers a fundamental benefit to GW data analysis.
