

Upcoming activities at the GR24/Amaldi16 conference

Wednesday 28 May 2025 15:54 (6 minutes)

The joint GR24 and Amaldi16 meeting will be held in Scotland, July 2025 and we are excited to share the public outreach and engagement program with the ET community. At the GR/Amaldi conference there will be two public lectures from Erin MacDonald and Carole Mundell. At the public lecture we will be running an exhibition showcase of outreach demonstrations and invite all participants to share their demonstrations and activities in addition to a Science-Art gallery. We are also running a Wikipedia Edit-a-thon event to improve scientific literacy around GR and GW and boost the biography profiles for under-represented people in our field. Finally, we are very excited by the new collaboration with the Science Ceilidh group to create public dances inspired by GW science, these dances will be debuted at the conference dinner as the starting point of an anticipated program of social engagement using dance to communicate GW science.
