## 1 Mock Cosmic Explorer server

For this moment server exists at the <https://et-rucio-server.to.infn.it:8443>. It is possible to download and upload files if you have access to storage elements in Torino or Louvain. There are two options for connecting: userpass and x509. Only with x509 it is possible to download and upload files.

## 2 Documentation

First version of documentation about ET and CE servers was maden. Comments are welcomed.

### 2.1 Client instruction

I added few things about CE server and part about x509 authentication.
