## Gravitational wave outreach initiatives in the EMR: current status

*Wednesday 12 November 2025 15:10 (15 minutes)*

Throughout Europe and in the Einstein Telescope Collaboration, there exist many great initiatives to share Einstein Telescope out of academia to stakeholders in education, politics, and general public. This is a vital part of our enterprise to realise ET, and many partners are sharing their best practices, including in the EMR. In this talk, I will highlight some of these initiatives and existing collaborations, and see how they can be connected still to other projects in and outside the EMR, making sure that the best case for ET is made to the general public throughout Europe.
